

More patient insights.
Better patient care.

Human. Kind.

Welcome to Connected Health with Trapollo.

We believe in putting patients front and center — it's at the core of everything we do.

At Trapollo, Connected Health isn't just about numbers, facilities and technology. It's about caring and compassion.

Because it's all about people.

We believe that those who have the insight and the courage to make patient care come first will be rewarded.

Let us be your bridge between technology, data and patient care. We understand the connectivity that links them.

The heart of our mission is to improve patient outcomes — to help them stay well and thrive through the tools and insights we provide.

It's part of Trapollo's unique approach in using intelligent technology to enhance the intimacy of patient caring. Making it more human. More kind. Let us show you how.

Improve the quality of care at every stage of life.

The healthcare industry is going through one of its most seismic shifts in recent memory.

The pressure to keep pace and operate more efficiently — while providing the best patient care — is ever-mounting for healthcare professionals today.

- Costs continue to rise at a rapid pace
- New payment and care models are disrupting the status quo
- Patients are seeking more personalized, individualized care

For more than 10 years, Trapollo has specialized in Connected Health that's focused on improving patient care by mobilizing clinical engagement. Our broad range of remote health monitoring applications, products and services goes beyond technology.

By integrating and automating clinician-to-patient processes and information, we help healthcare providers and payors by giving them actionable data that lets them focus on delivering better patient care.

We help extend care beyond the walls of facilities by meeting people where they are in their day-to-day lives.

Realize your vision for Connected Health in your organization.

Success in designing and building a truly Connected Health ecosystem often has less to do with technology and is more about understanding people and building strong processes. We believe the key to better outcomes and managing margins is about being patient-centric and making strong human connections.

Trapollo provides highly personalized solutions by connecting the technology and data along with logistical support that's matched to each of your individual patient's needs. Which means your teams have more insight and clarity into patients' lives — and you can be more focused on goals such as:

- Delivering better patient care and outcomes
- Reducing costs, readmissions and ER visits
- Increasing patient satisfaction and at-home compliance rates

We can provide you with world-class Program Design and Consulting, integrated clinical applications and program operations and support. As part of the Cox Communications family dedicated to improving the quality of life across communities, Trapollo is leveraging the power of connectivity to bring technology where it is needed, providing more effective and continuous care.

Technology, actionable data and logistical support that gives you more.

TRAPOLLO CONVERGE

Secure cloud-based, connected-patient engagement — that extends care beyond the traditional walls of healthcare.

Trapollo Converge is a highly flexible and extensible virtual care platform that provides you with a full-featured, configurable Connected Health solution comprised of two primary parts:

- The Patient Engagement Platform for patients
- The Care Management Portal for clinical teams

Our secure cloud-based solution delivers patients and clinicians healthcare that's preemptive instead of reactive. It's the ultimate in remote care management that allows you to focus on:

- Reducing readmissions and avoiding readmission penalties
- Monitoring patients remotely to ensure better health and financial outcomes
- Gaining more insights into patients' daily lives by incorporating Patient Generated Health Data (PGHD)
- Rewarding and incentivizing patients to create better compliance and adherence rates
- Utilizing actionable data

CONSULTING

Design, optimize and implement.

Our step-by-step approach is designed to take the complexity out of building and scaling a Connected Health program for success — before you invest significant financial resources so you can:

- Avoid wasting time and budget dollars and scale your program in a positive direction
- Work effectively and efficiently with proper process flows
- Customize a framework for your organization and your goals

Simple

We take the complexity out of Connected Health, making it simple for patients to comply with treatment plans.

Personal

The consumer/patient user interface creates an engaging concierge-like care coordination experience.

Automated

Our platform, solutions and services use technology to create a high-frequency/high-touch patient experience, while delivering automated/low-touch solutions for providers.

Intelligent

We use technology to automate clinical workflows, increase efficiency and assist the care team to address the most critical patients and needs.

Inclusive

We use technology to connect caregivers to both the patient and their providers, giving them a 360-degree view, while better equipping them to support the patient along their care journey.

LOGISTICS AND DEVICE MANAGEMENT

Connect the IoT to your ROI.

The Internet of Things (IoT) has grown exponentially in healthcare today. Because of our 10+ years of experience in Remote Patient Monitoring (RPM) and Logistics, we have designed a thoroughly documented, expert process as a solution to the complex challenge of equipment flowing in and out of a patient's home. We also specialize in:

- Inventory and asset management
- Mobile Device Management (MDM)
- Program management and patient technology support

Our back-end supply chain platform, which seamlessly integrates with Trapollo Converge, works in conjunction with your existing processes and integrates directly into your current IT infrastructure. So your program runs smoothly and your healthcare staff remains free of logistical disruptions — helping to save you time and money.

Trapollo is proof that a patient-first approach to Connected Health benefits everyone involved. Making it more human. More kind. Let us show you how.

While no two clients are alike, this is one example of what we've been able to help our partners achieve.

Learn how we have successfully operationalized some of the largest Connected Health programs in the U.S. To request a consultation, call 866-807-5047, or go to [Trapollo.com](https://trapollo.com).
